

QA Engineer ASSIGNMENT 2026

(Bellamkonda Thishitha Sai)

PART 1: Manual Test Cases — Login Functionality

<u>TC ID</u>	<u>Test Case</u>	<u>Test Steps</u>	<u>Expected Result</u>	<u>Actual Result</u>	<u>Status</u>
TC01	Valid Login	1. Open login page 2. Enter Admin/admin123 3. Click Login	Dashboard loads successfully	Dashboard loaded successfully	PASS
TC02	Invalid Username	1. Enter wrong username 2. Enter correct password 3. Click Login	Error: "Invalid credentials"	Error shown correctly	PASS
TC03	Invalid Password	1. Enter correct username 2. Enter wrong password 3. Click Login	Error: "Invalid credentials"	Error shown correctly	PASS
TC04	Empty Username	1. Leave username blank 2. Enter password 3. Click Login	Validation: "Required" shown	Required message shown	PASS
TC05	Empty Password	1. Enter username 2. Leave password blank 3. Click Login	Validation: "Required" shown	Required message shown	PASS

TC06	Both Fields Empty	1. Leave both blank 2. Click Login	Both fields show "Required"	Both required messages shown	PASS
TC07	Password Visibility Toggle	1. Enter password 2. Click eye icon to toggle visibility	Password toggles between visible/hidden	No toggle option available on login page	FAIL
TC08	Forgot Password Flow	1. Click Forgot Password 2. Enter username 3. Click Reset Password	Success message or confirmation shown	Page loads indefinitely, no response	FAIL
TC09	Case Sensitivity in Username	1. Enter "admin" (lowercase) 2. Enter correct password 3. Click Login	Should reject — username is "Admin"	Login successful — case insensitive	FAIL
TC10	Password Field Accepts Spaces	1. Enter valid username 2. Enter only spaces in password field 3. Click Login	Validation error: "Invalid password" or spaces not accepted	Login attempted with no validation error for spaces	FAIL

potential bugs or usability issues in the login page

Bug 1 — No Account Lockout (no CAPTCHA or lockout after multiple failed attempts)

- After repeated failed logins, no lockout or CAPTCHA triggered
- Security risk — brute force attacks possible
- Severity: **High**

Bug 2 — Forgot Password Infinite Loading (page keeps loading, no feedback)

- Clicking Reset Password causes infinite page load with no feedback
- Users cannot reset their password — completely broken flow
- Severity: **High**

Bug 3 — No Password Visibility Toggle

- No eye icon to show/hide password
- Poor usability — users can't verify what they typed
- Severity: **Medium**

Bug 4 — Case Insensitive Username

- "admin" and "Admin" both successfully log in
- Potential security concern — usernames should be case sensitive
- Severity: **Low**

Bug 5 — Password Field Accepts Spaces

- Entering only spaces as password passes validation
- Should show "Invalid" or "Required" error
- Severity: **Low**

PART 2: Employee Management Test Cases

<u>TC ID</u>	<u>Test Case</u>	<u>Test Steps</u>	<u>Expected Result</u>	<u>Actual Result</u>	<u>Status</u>
TC11	View Employee	1. Login 2. Go to PIM → Employee List 3. Search employee	Employee details displayed	Employee found and displayed correctly	PASS
TC12	Add Employee	1. Go to PIM → Add Employee 2. Enter name 3. Click Save	Employee added successfully	Employee added — search showed "no records" initially, resolved on retry	PASS
TC13	Update Employee Name	1. Open profile 2. Edit name 3. Save	Name updated with confirmation	Name updated successfully	PASS
TC14	Update with Empty Name	1. Open profile 2. Clear name 3. Save	Validation error shown	Required validation shown correctly	PASS
TC15	Delete Employee	1. Employee List 2. Click delete icon 3. Confirm	Employee removed	Employee deleted successfully	PASS
TC16	Search Non-Existent Employee	1. Search name that doesn't exist	"No records found" shown	"No records found" displayed correctly	PASS

TC17	Add Duplicate Employee	1. Add employee with same name twice	Warning shown	Duplicate name allowed — auto Employee ID collision in shared demo environment	FAIL
TC18	Special Characters in Name	1. Enter @#\$% in name 2. Save	Validation error	Special characters accepted and saved successfully	FAIL
TC19	Numbers in Name	1. Enter Thishi123 in name 2. Save	Validation error — names should be alphabetic	Numbers accepted and saved successfully	FAIL
TC20	Spaces Only in Name	1. Enter spaces only in name 2. Save	Validation error	Required validation shown correctly	PASS
TC21	Update with Special Characters	1. Edit name with @#\$ 2. Save	Validation error	Special characters accepted and updated successfully	FAIL

Bug 6 — Special Characters Accepted in Employee Name

- Entering @#\$% in first/last name fields is accepted and saved
- Names should only allow alphabets, spaces, and hyphens
- Severity: **Medium**

Bug 7 — Numbers Accepted in Employee Name

- Entering John123 saves successfully without validation
- Names should be alphabetic only

- Severity: **Medium**

Bug 8 — Duplicate Employee Names Allowed

- System allows adding two employees with identical names
- No warning or duplicate check — can cause confusion in records
- Severity: **Low**

Bug 9 — Employee ID Auto-Generation Collision

- Auto-generated Employee IDs collide when multiple users use demo site simultaneously
- Users cannot add employees when ID is already taken
- Severity: **High** (in shared/demo environments)

Bug 10 — Inconsistent Search After Adding Employee

- Newly added employee sometimes doesn't appear in search immediately
- Requires re-search or page refresh to find
- Possible caching or indexing delay issue
- Severity: **Medium**
